Other Helpful Documentation

This manual covers the basics of setting up and working with your printer. However, you may find the following publications helpful when working with PostScript printing.

PostScript Language Reference Manual, Second Edition. This manual, published by Addison Wesley, is designed for advanced users, such as programmers, who work with PostScript operators.

PostScript Language Tutorial and Cookbook. This manual, published by Addison Wesley, is designed for those who want to learn about working directly in the PostScript language.

Most bookstores and many computer businesses either keep these books in stock or can order them for you.

About Your Printer

The Accel-a-Writer 8200's high-end features allow you to produce near typeset quality work, suitable for camera-ready production. The standard, smooth 600 x 600 dpi resolution can be further enhanced by an upgrade to 800 x 800 dpi or 1200 x 1200 dpi.

Your printer features Adobe PostScript, not an emulation. This format gives you a wide range of flexible features such as scaling, filling, and rotating.

The AMD 29030 RISC processor, 12 MB RAM, and XANTÉ's technology help ensure fast, reliable, professional performance. Memory upgrades provide the extra space required for higher resolution printing when you have added a resolution upgrade to your printer and for oversized printing.

For example, 20 to 28 MB provides 800 x 800 dpi capability and 40 MB or more offers 1200 x 1200 dpi printing. And, 16 MB or more allows for oversized printing. (High resolution kits and memory upgrades are available from XANTÉ. For details contact XANTÉ Customer Support at 800-926-8393 in the US and Canada, at 95-800-926-8393 in Mexico, or at 334-342-4846 in other countries.)

Note: Occasionally, a complex, large file or one with heavy graphics may require more than the standard memory to print. Memory requirements also vary depending on the chosen resolution.

Your Accel-a-Writer 8200 offers out-of-the-box advanced paper handling capability. For example, you can print on paper, transparencies, labels, and envelopes. The printer also features a total input capacity of 350 sheets—250 sheets in the standard paper cassette and another 100 sheets in the fold down tray. Both of these input sources support up to ledger (11" x 17")/A3 size paper.

The fold down tray handles variable custom and oversized media from 3.90" x 5.80" up to 11.81" x 25.00". Plus, an extra wide print option is available to expand paper handling up to 12.00" x 25.00". See "Selecting Media" in chapter 6 for details on page sizes and imageable areas.

Note: Media size is the actual size of the media. The imageable area is slightly smaller. For example, 11.81" x 25.00" paper has an imageable area of 11.73" x 24.93".

If you require an even higher input capacity, you can add a second 250 sheet input cassette with an optional paper feeder or an additional 500 sheet letter size cassette with an optional paper feeder and a cassette supporter.

Macintosh and PC/compatibles can be used concurrently on the Accel-a-Writer 8200 with simultaneously active serial, parallel, LocalTalk, and (optional) EtherTalk interfaces. You do not have to send software commands or manually set hardware switches when a different interface is used. In addition to PostScript, HP PCL 5 and HP-GL emulations are supported for line printer and other non-PostScript applications.

About XANTÉ Utilities

XANTÉ Utilities include easy-to-use, menu driven programs and files to make working with your new printer more convenient. For example, they contain practical programs such as printer description files required for PageMaker, FreeHand, QuarkXPress, and the LaserWriter 8 printer driver. The utilities also have a namer feature in Command Center to prevent confusion on networks where several printers are the same model; you can leave one printer with the model name (Accel-a-Writer 8200) and rename the other “Sales 8200.”

The utilities come on 2 disks—one for Macintosh environments and another for PC formats. For detailed information see “Installing XANTÉ Utilities (Macintosh)” in chapter 3 or “Installing XANTÉ Utilities (PC)” in chapter 4.

Appendix C contains the warranty on your Accel-a-Writer 8200 printer. Please be sure to return the warranty sheet included with your printer package. Returning this sheet not only registers your printer, but it also entitles you to a free subscription to XANTÉ's *Accel-a-Writing* newsletter. Our publication features articles on printing, new options as they become available, and tips for using your printer to the best advantage.
